

Invited as Speaker on Movement Disorders Symposium at Isra University

Dr. Muslim Ali Lakhair Speaks at Movement Disorders Symposium

Dr. Muslim Ali Lakhair, Associate Professor of Neurology, was invited as a distinguished speaker at the Movement Disorders Symposium held at Isra University on 11th December 2025.

During the symposium, he delivered an insightful lecture titled *“Unraveling Dystonia: From Clinical Clues to Targeted Therapies.”* In his presentation, Dr. Lakhair comprehensively discussed the clinical spectrum of dystonia, emphasizing early recognition through key clinical clues and highlighting advances in diagnostic approaches. He further elaborated on modern management strategies, including pharmacological options, botulinum toxin therapy, and emerging targeted treatments, aiming to improve patient outcomes.

His lecture was highly appreciated by faculty members, postgraduate trainees, and practicing clinicians for its clarity, depth, and practical relevance. The session concluded with an interactive discussion, reflecting the growing interest in movement disorders and the importance of specialized neurological care.
