

Activity Report

***LUMHS Students Entitled to Teach Primary
School Children***

Liaquat University of Medical and Health Sciences (LUMHS) offers education at Levels 6, 7, and 8, ensuring that its academic programs meet high national and international standards. Graduates of the university, upon successful completion of their studies, are well-qualified to teach at the primary, secondary, and higher levels of education, reflecting the university's emphasis on academic excellence and professional competence.

Each year, LUMHS produces a significant number of skilled graduates who are equipped with the knowledge, skills, and ethical values necessary to contribute meaningfully to society. The university maintains a strong bond with its alumni, fostering continuous professional engagement and collaboration. With an impressive graduate employability rate, LUMHS demonstrates its success in preparing students to enter the workforce and serve their communities effectively.

Furthermore, final-year students actively participate in community outreach initiatives by organizing educational sessions for school children. During these sessions, they deliver lectures and conduct interactive activities aimed at enhancing students' understanding of science, health, and general education. These efforts not only strengthen the connection between the university and the local community but also nurture a culture of mentorship, leadership, and lifelong learning among LUMHS students.

LUMHS Students Teaching and Mentoring School Children

Liaquat University of Medical and Health Sciences (LUMHS) is deeply committed to providing quality education and extending learning opportunities beyond the university campus. In addition to excelling in their professional programs, LUMHS students are well-equipped with the knowledge, skills, and pedagogical abilities necessary to teach at the primary and secondary levels of education. This reflects the university's dedication to nurturing socially responsible graduates who contribute meaningfully to educational development in their communities.

As part of its community engagement and outreach initiatives, LUMHS regularly invites school children to participate in various educational activities designed to inspire curiosity, enhance learning, and promote interest in science and health education. LUMHS students and faculty also visit schools to deliver interactive lectures, conduct demonstrations, and mentor young learners. This initiative reflects LUMHS's dedication to social responsibility and its ongoing efforts to bridge educational gaps by empowering the next generation through knowledge and mentorship.

LUMHS students conducted engaging classroom sessions in a local primary school

The team interacted with children, explained basic educational concepts, and encouraged active participation. The students appeared attentive and eager to learn, reflecting the positive impact of such outreach programs.

The activity also focused on promoting a supportive learning environment by guiding students on good study habits, hygiene practices, and the importance of regular schooling. The presence of the LUMHS team created an inspiring atmosphere, as the young learners were able to connect with role models from the medical and academic community.

This initiative highlights LUMHS's dedication to **Quality Education**, as the university continues to extend educational support to marginalized communities. Such outreach activities play a crucial role in uplifting young learners, fostering confidence, and promoting equal access to opportunities for children in underserved areas.
